KARMA COIN

MONEY THAT GROWS WHEN WE GIVE

A COMMUNITY ECONOMY THAT FUNDS REAL PROJECTS
AND PUBLISHES THE PROOF EACH MONTH

THE HEART OF THE MOVEMENT

We believe everyone is a light. Artists. Healers. Builders. Dreamers. We do not compete. We co-create.

Three ideas

- 1. **Self-Realization**, know who you are.
- 2. Alignment, let thoughts, emotions, and actions move together.
- 3. Community, share, help, and grow instead of fight and take.

Why now

People want to help, but giving is slow and opaque. Karma Coin turns intent into action you can see each month.

HOWIT WORKS

IDEAS COME IN

Anyone can submit a project (e.g., plant a food forest, fund a local arts program).

OPEN REVIEW

Proposals are discussed in public Town Halls.

COMMUNITY DECIDES

Elected community leaders vote; if approved, money is released in stages (not all at once).

PROOF FIRST, THEN MORE

Each month, projects post simple evidence (photos, receipts, updates).

If proof is missing, the next stage pauses.

OPTIONAL RECYCLING

If a funded project earns a surplus later, the community can choose to send a portion back to the shared fund to start the next projects. (This is not a payout to holders.)

PHASE III → AUTONOMY(24-48 MONTHS)

- Fully decentralized governance.
- Partially automated treasury via ReFi yield.
- New Earth hubs running on Karma.
- Karma Coin accepted worldwide.

SINCE WE ARE ALL **ABOUT TRANSPARENCY**

Every unlock, wallet, and receipt is public and verifiable.

No demand, no unlock. Supply expands only when real buy orders fill.

How it works

- 1. The DAO publishes price tiers on MEXC with the amount per tier.
- 2. Sell orders are posted in the public order book. Everyone can see them.
- 3. When buys fill a tier, tokens enter circulation. If no buys, nothing unlocks.
- 4. The filled tier's proceeds go 100% in USDT to the public treasury.
- 5. Grants leave the treasury in milestones after monthly proof is verified.

Controls

Multi-approval treasury with timelocks, Recorded Town Halls, Audits, Live dashboards, All proof is shown on the transparency dashboard.

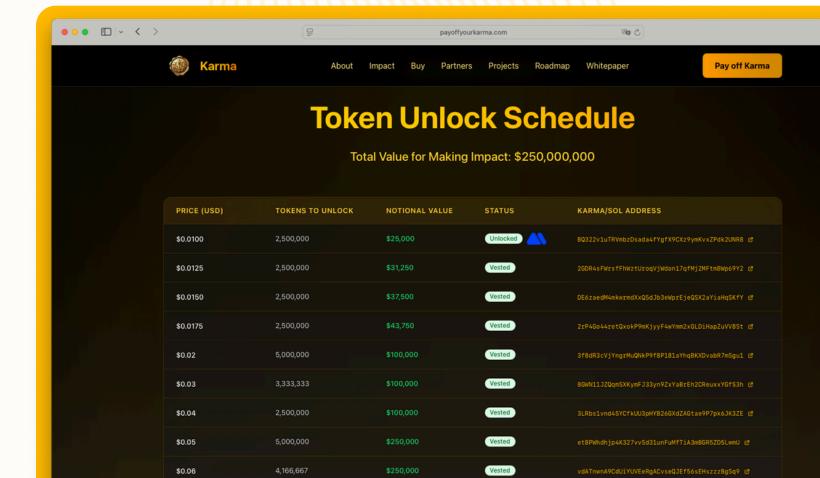

No private unlocks. No OTC. No surprise emissions.

Supply, treasury inflows, and project funding all scale with market demand, not before. This reduces dump risk, creates clear entry points, and aligns growth with real participation.
